

Mind the Story: Posing Questions with Design

Programme

12:00 – 12:25 Interactive presentation

12:30 – 13:00 Interactive demo

13:30 – 13:55 Interactive presentation

14:00 – 14:30 Interactive demo

15:00 – 15:25 Interactive presentation

15:30 – 16:00 Interactive demo

17:00 – 17:25 Interactive presentation

Posing Questions with Design

Lenneke Kuijer (TU/e)

Iva Rešetar (UdK Berlin)

Karin Niemantsverdriet (TU/e)

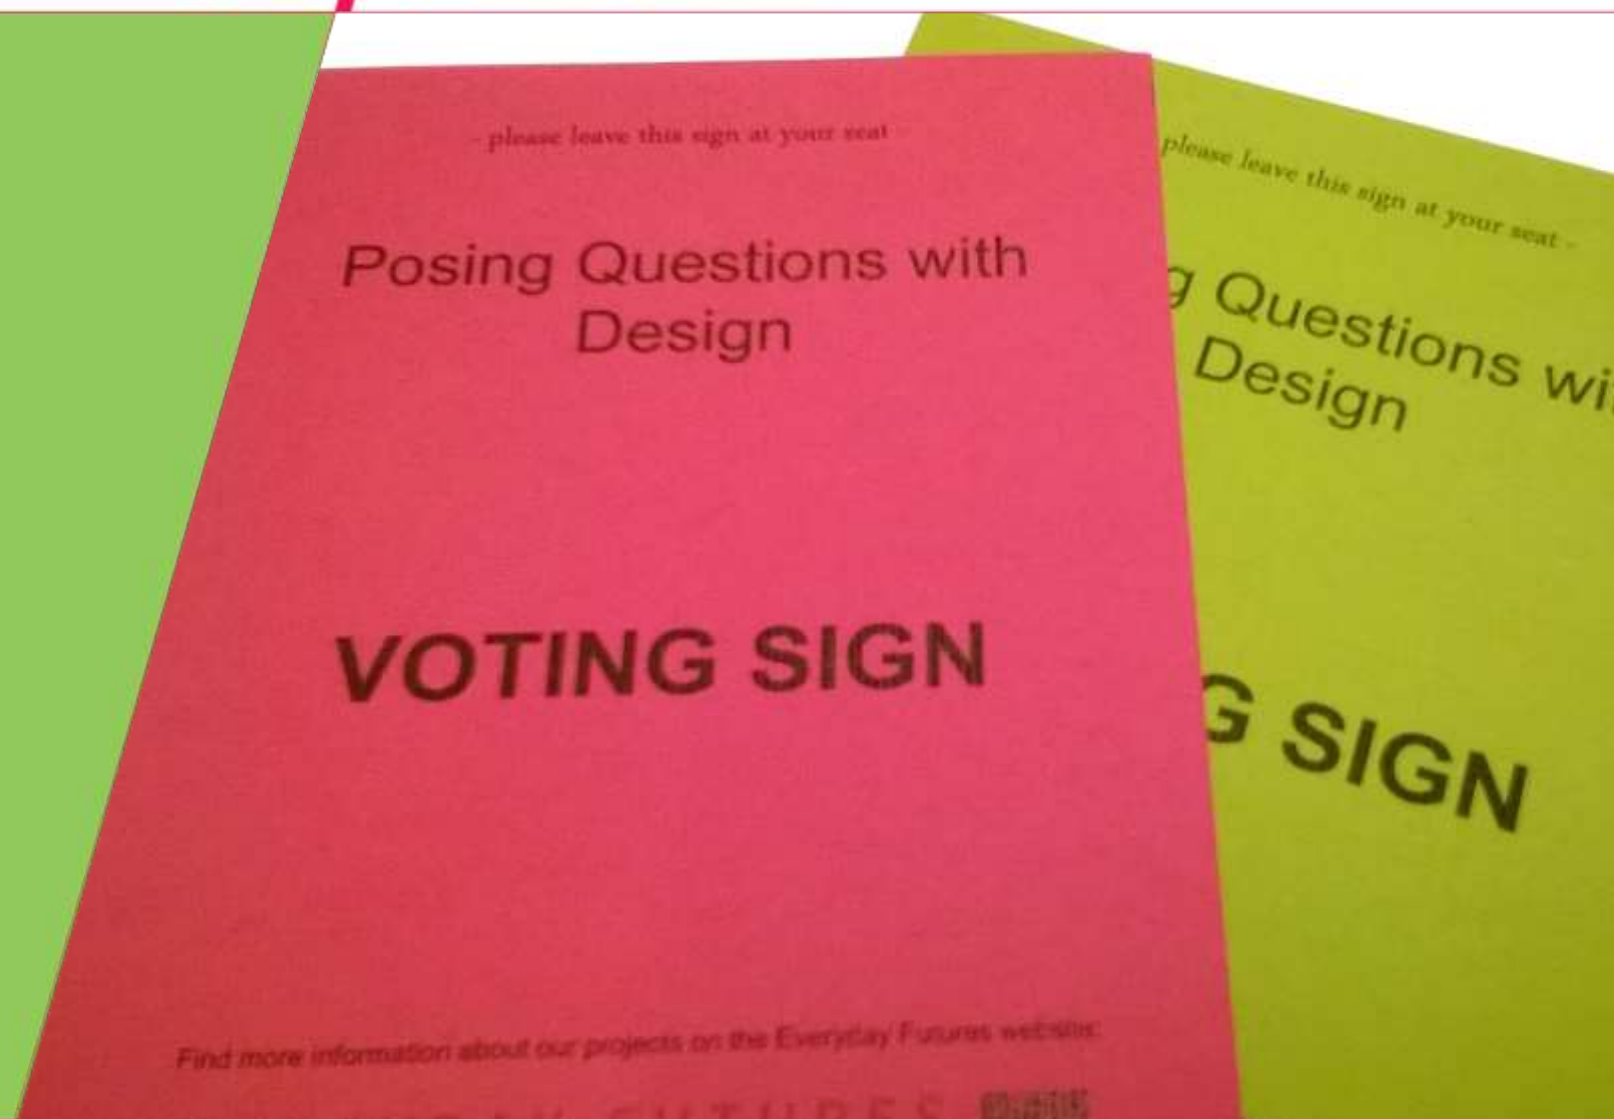

Iohanna Nicenboim (TU Delft)

Daniel Suárez (UdK Berlin)

Marie Heidingsfelder (Fraunhofer
CeRRI)

Marina Castan Cabrero (Royal
College of Art)

An interactive presentation

Posing questions with design

“the designing and making of a new thing is a particular way of asking if this thing exists today how our everyday world would be altered”

Ron Wakkary, in ‘Designing to Know’ (2016)

Researching future everyday life

EVERYDAY FUTURES

network / workshops / resources

UnderAir

Iva Rešetar (UdK Berlin) & Karin
Niemantsverdriet (TU/e)

How will future climate extremes affect the way we dress and inhabit spaces?

We will move indoors and rely on air conditioned spaces.

We will rely on hyperfunctional clothing to keep our bodies comfortable.

If we were to control our personal climate, how would it behave?

It would offer a
ideal, stable
conditions at all
times.

It would have the
unpredictable
character of
weather

How personal and intimate do you want the future climate to be?

Like underwear:
intimate, individual
and unexposed to
others.

Like fashion:
exposed statement,
and a social and
shared experience.

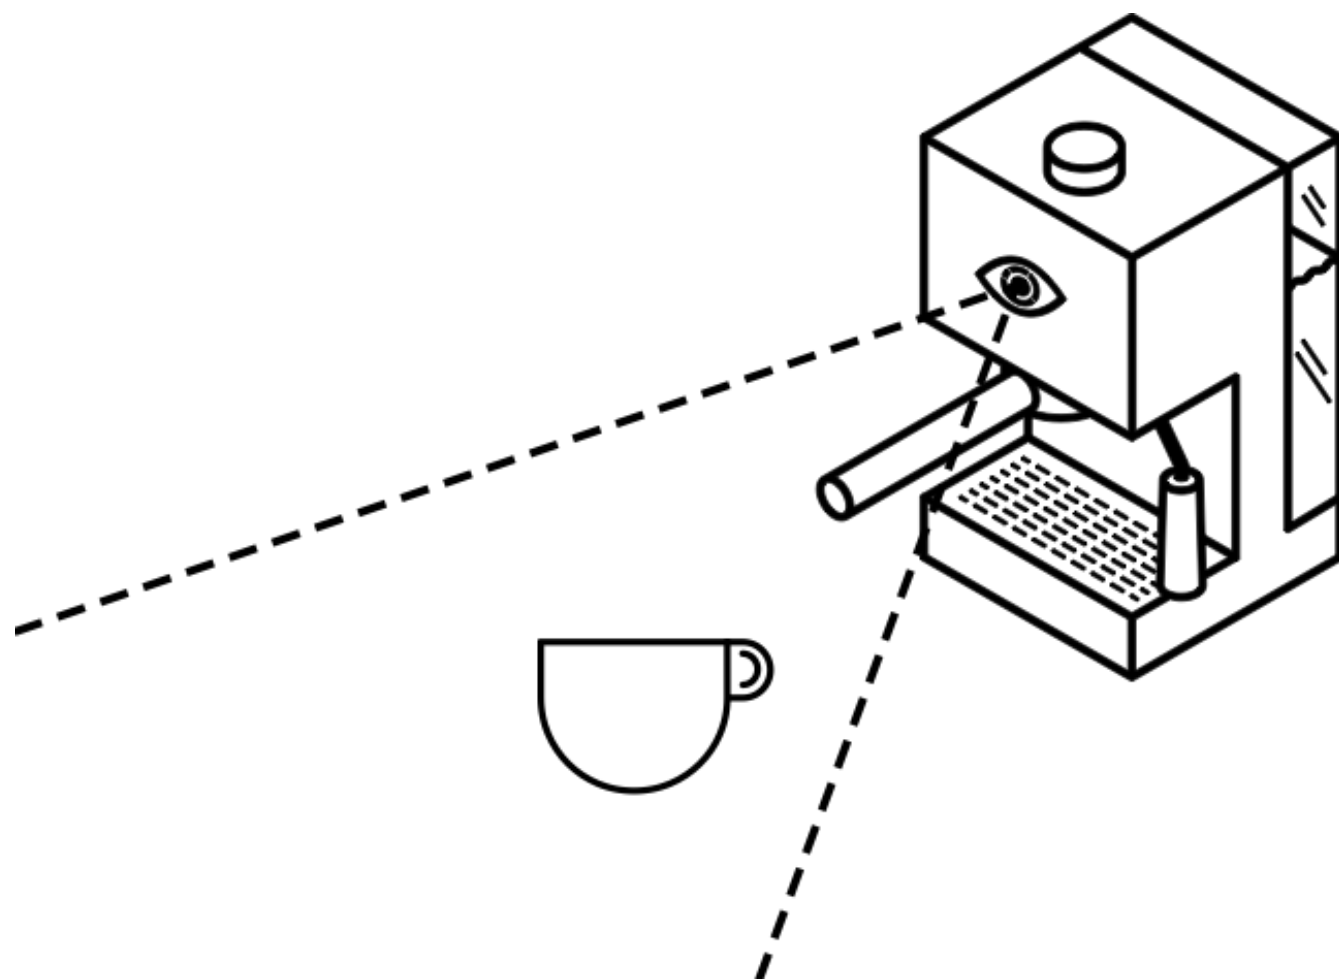

Objects that withdraw

Iohanna Nicenboim (TU Delft) &
Daniel Suárez (UdK Berlin)

Anti Surveillance Clothes - Adam Harvey

Should we let Things hide from us?

Yes, they have the
right to do so

No, we cannot lose
control

How do you think this virus could have originated?

Probably hackers
or designers

Objects themselves

Should we let Things see other Things, and us?

Yes, they can be
good designers

No, that could have
serious
consequences

Space2Go

Marie Heidingsfelder (Fraunhofer
CeRRI), Marina Castan Cabrero
(Royal College of Art)

What does 'being present' mean?

Bodily presence
requires being
aware of the
environment and
the others

Loosing yourself in
virtual data is just
like daydreaming

Will public spaces still be spheres of social interaction in the future?

In the future, interactions with strangers in public will no longer be necessary

In the future, smart technologies will facilitate social life in public spaces

Is data a space to go in?

Immersing in a virtual world, we can forget everything else around us.

Even when immersed in a virtual world, we always remain present in a physical space

Interactive demo's

Want to know, say or experience more?

You can now ...

- ... create your own objects that hide
- ... experience the Space2Go
- ... make your own future advertisement
- ... interact with a real personal climate
- ... hear more from our designers/researchers
- ... continue discussing 'with the artefacts'

Thank you for your
attention
