Workshop
From Evolution to Revolution, a roadmap for beyond 5G
An ICT Beyond 5G Cluster workshop

ICT Beyond 5G Cluster is delighted to announce the Workshop from Evolution to Revolution, a roadmap for beyond 5G.

Scope

5G is not yet fully deployed, but its initial definition based on challenging targets, e.g. 1000 k connections per km², billions of IOTs, 10s Gb/s connections, 1 ms latency, has been surpassed by unpredictable and new scenarios stemmed from the fast changes of the modern world. 5G is more a new environment rather than a distribution modality of internet. As soon as 5G started, its transformation and mutation are continuously reshaping it. It was an evolution, now it is a revolution.

As all the revolutions, enthusiasms, actions, ideas, achievements flourish every day. The question is: what after the revolution? This workshop takes energy from a formidable congregation of leading scientists, members of the first ever cluster of EC Horizon 2020 projects. The ICT Beyond 5G Cluster is formed by the successful projects of the call ICT 09, worth more than €20M. Seven projects complementary and visionary funded to respond to the 5G revolution.

The workshop will explore new streams beyond 5G by invited speakers, by discussing the latest results of the H2020 projects members of the cluster and by soliciting visionary contributions from the 5G community.

The aim is to stimulate a collective brainstorming to predict where the revolution is heading, what the technology can achieve and what impact will be on future deployment, economy and society. At the end of each talk, instead of the typical Q&A, audience will be asked to extract key concepts and noted on a virtual board.

Three focus groups in three different key areas will collate key words and concepts with the aim to shape future visions of beyond 5G.

A panel session will challenge those visions to converge in one or more "beyond 5G" revolutionary scenarios and landscapes.

Topics

Track 1 5G Evolution

Mm-wave / THz networks
MIMO and beyond
Deployment scenario
Photonics and wireless integration

Track 2 5G Revolution

Verticals
Architectures
Photonics and wireless systems
Physiscal and virtual layers

General Chairs

Claudio Paoloni, Lancaster University, UK
Angeliki Alexiou, University of Piraeus, Greece

ICT Beyond 5G Cluster Steering Committee

Alan Davy, Waterford Institute of Technology, Ireland
Angeliki Alexiou, University of Piraeus, Greece
Bruce Napier, Vivid Components Ltd., Germany
Claudio Paoloni, Lancaster University, UK
Mir Ghorashi, pureLiFi, UK
Onur Sahin, InterDigital, UK
Thomas Kürner, TU Braunschweig, Germany
Vladimir Ermolov, VTT Technical Res. Centre, Finland

Technical Programme Committee

Chair Thomas Kürner, TU Braunschweig, Germany
Andre Bourdoux, Imec, Belgium
Andrea Mazzanti, University of Padova, Italy
Coljia Schubert, Fraunhofer HHI, Germany
Dominic O'Brien, Oxford University, UK
Olivier Bouchet, Orange, France
Viktor Krozer, Goethe University Frankfurt, Germany
Thomas Merkle, Fraunhofer, Germany
Rodolphe Legouable, IRT B-com, France
Norbert Wehn, TUK, Germany
Marion Habernig, Tekhnicon, Germany
Nikola Serafimovski, pureLiFi Ltd, UK
Ravinder Singh, Oxford University, UK
Tetsuya Kawanishi, Waseda University, Japan

Paper Submission

Deadline for paper submission: May 15, 2019
Acceptance Notification: June 30, 2019
Camera-Ready Submission: July 31, 2019
Accepted and presented paper will be added to IEEE Xplore and the conference proceedings
Submission at
