

# Build a bee B'n'B

Support your garden bees by building a bee hotel for  
International Plant Fascination Week 2021

## Why?

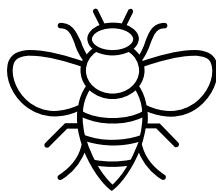

- ❖ Bees pollinate our trees and flowers to supply our food.
- ❖ They need a place to shelter and rest.
- ❖ In spring, bees need a space to make a nest and lay eggs.

## How?

- ❖ Find an old plant pot and some bamboo canes.
- ❖ Cut the bamboo to match the size of the plant pot (don't forget - ask a grown up to help you!).
- ❖ Wedge the bamboo into the pot so there's no gaps.
- ❖ Tie some string around the pot.
- ❖ Hang in a sunny, sheltered spot where there's lots of flowers and wait for the bees to visit!

75% of crop  
plants rely on  
pollinators  
such as bees

Bees have a  
brain the size of  
a poppy seed.
